Sik Protect Separation Walls

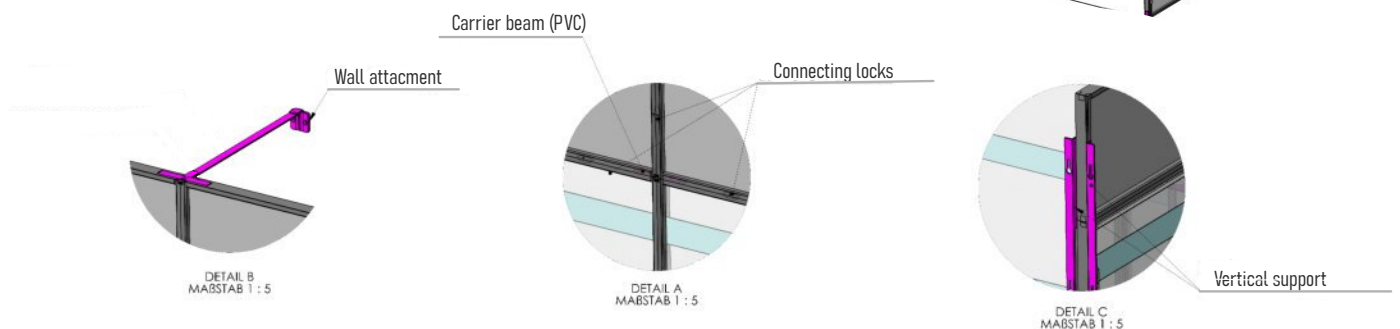

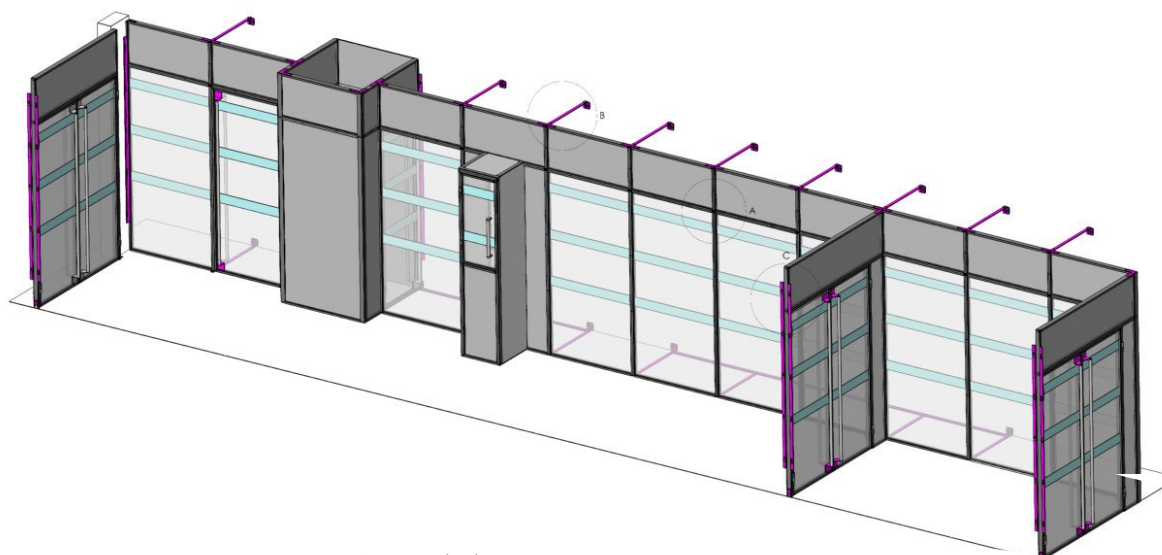

On demand quick construction walls for hospital wards/ ICU's

We have developed a unique system for segregating on demand ward areas on request of hospital ICU's dealing with varying admission numbers of CoVid-patients.

The modules can be constructed optionally consisting of the following components:

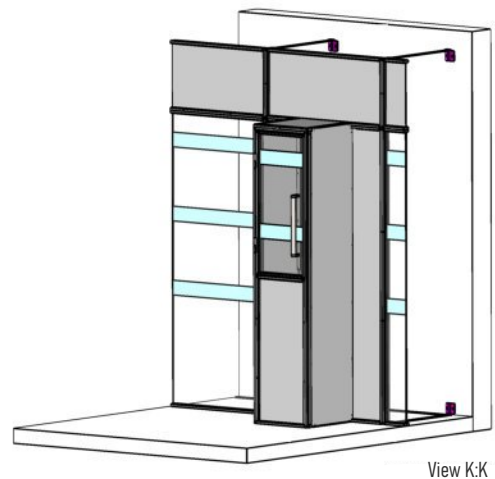

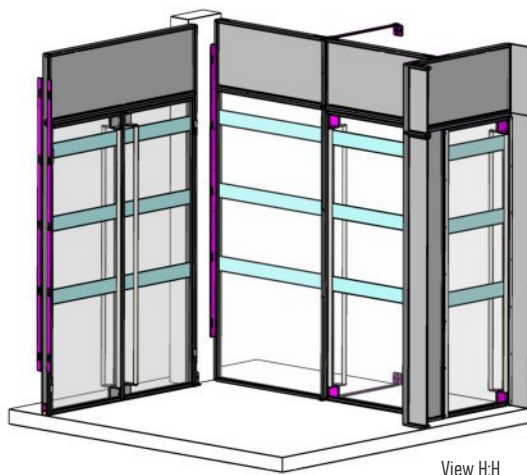

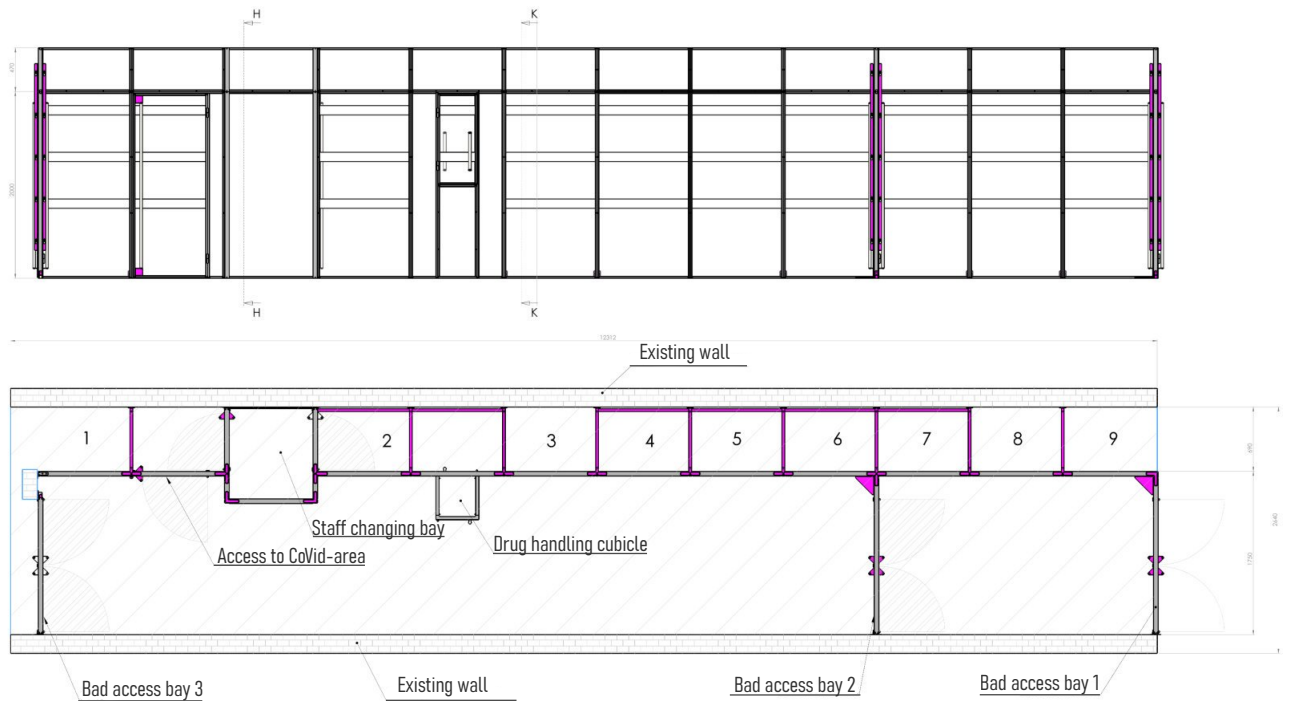

- Basic wall partitioning modules made of certified 8mm laminated safety glass and supported by interlocking pvc-beams
- Staff entry bay
- Pharmacy cubicle
- Patient bed entry bays
- Optional print applications for the glass walls

Ask us for an offer suited to your particular specifications!

Sik Protect Separation Walls

On demand quick construction walls for hospital wards/ ICU's

Sik Protect Mobil

Moveable glass partitioning on tested and efficient rollers with ergonomic handles

Moveable glass partition with a proven system of handles and rollers.

A construction consisting of a 6 mm single pane safety glass slotted into a stable, rollable brushed steel base.

All glass panes can be ordered with print themes of your choice and are resistant to cleaning agents and disinfectants. We recommend landscape themes for a relaxing atmosphere for patients.

Standard sizes:

600 mm x 1700 mm (WxH) e.g. for privacy in waiting areas

800 mm x 1700 mm (WxH) e.g. for the waiting areas

1400 mm x 1700 mm (WxH) e.g. for treatment and examination rooms, for privacy between beds

Ask us for an offer suited to your particular specifications!

Sik Protect Mobil

Privacy with a relaxing view

Sik Protect Mobil

Privacy with a relaxing view

Sik Protect Classic

Elegance in glass and brushed stainless steel

This variation of our Sik Protect product family offers a unique designer stand of high quality brushed stainless steel, a solid yet elegant construction, an eyecatcher in any waiting room with the glass pane, preferably with a colour print applied.

Of course we use 6mm certified safety glass that can be printed with a template of your choice to match the room interior.

A further option is a **LED-light** bar integrated in the stand which reflects in the glass margins and enhances the print colours creating a stunning effect.

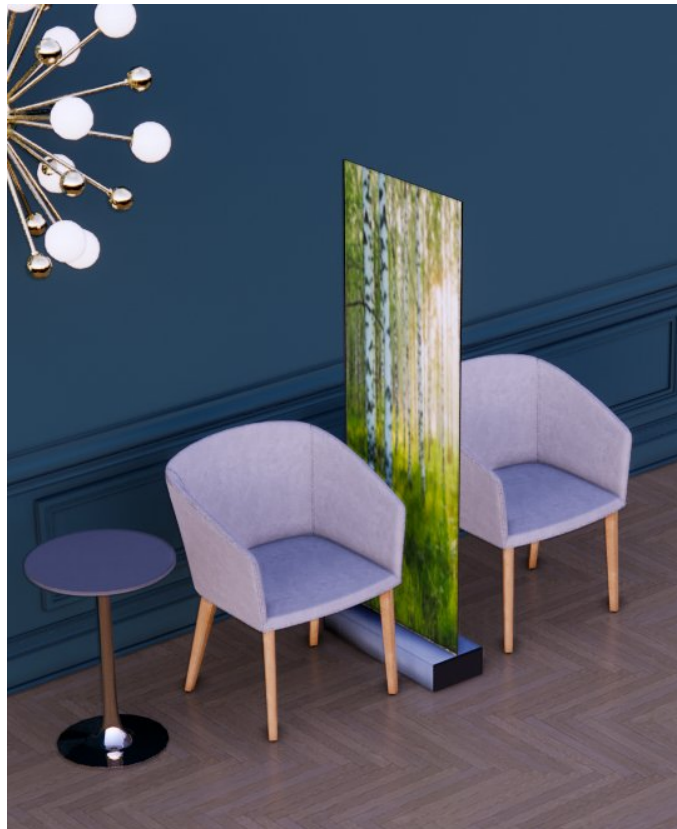

The assembly is very simple and requires only one person.

Our standard sizes:

600mm x 1700mm (w x h) e.g. for waiting areas

800mm x 1700mm (w x h) e.g.. for waiting areas or meeting/consultation corners

Ask us for an offer suited to your particular specifications!

Sik Protect for Seating Rows

For additional privacy and protection Sik Protect Classic is adaptable for fixed seating rows between seats, individual designer steel stands with safety glass panes shaped to fit the existing seat rows. Practical and an eyecatcher in the waiting room.

Standard sizes:

600mm x 1700mm (w x h)

800mm x 1700mm (w x h)

Sik Protect for Seating Rows

Sik Protect Modular Construction Kit System

expandable and changeable as required.

There are numerous variations and possibilities in this product range.

The modular construction system allows an individual solution for every type of room based on the same components. These are:

- Elegant PVC supports based on a click-in system (no tools required!)
- Single pane 6mm safety glass components
 - 600mm x 1700mm (w x h)
 - 800mm x 1700mm (w x h)
 - 400mm x 1700mm (w x h) optional for backing

These slot into grooves in the supports. Simple and stable.

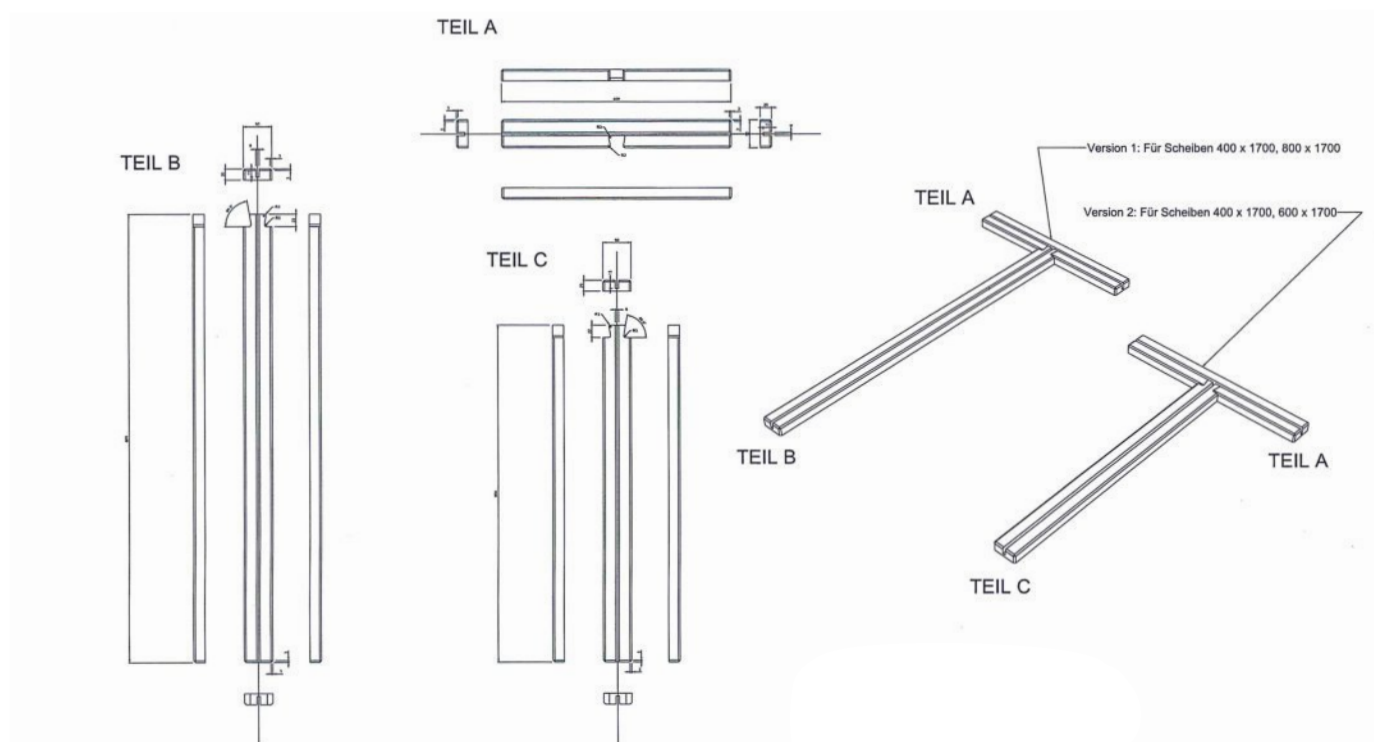

When connecting 2 units there is the option of using glass of different colours to achieve visual effects or to insert a printed glass panel as a connecting element thus also enhancing the stability.

Glass can be ordered with individual printed themes to fit in with your waiting room interior.

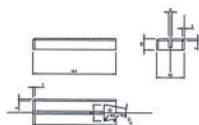

Let us make you an individual offer!

Sik Protect Protection Cubicles

Infection Cases Clinic - in Safety!

These cubicles are constructed in a unique modular connection system with the option to add on any time or change the layout as all components are based on standard measurements.

Hygiene and protection of staff, patients and clinic is the aim achieved with precision and ease. The safety and protection is ideal for cleaning and disinfectants without loss of transparency or colour brilliance of the prints.

Printed pictures that promote well-being and relaxation, e.g. landscapes, are recommended. In all waiting areas it is important that mental stress is minimised and the eyes are diverted to interesting and relaxing themes.

Numerous clinics that have installed our system can confirm these beneficial effects.

Contact us for a suitable solution for your clinic, waiting room or hospital and an offer!

Your
Sik Tec team

Mathias

- Consists of 3 safety glass panes each 1100 mm width x 1700 mm height and satinated
- The satinated side panes are standard with a transparent part 600 mm along the bottom for safety reasons
